WNC and E. Tenn Fall Guide Report

It is that time of year when the leaves turn, cooler temperatures arrive, and fishing conditions improve.

Trophy Water

If you are looking to target trophy fish, our exclusive private water is fishing extremely well. AFG guests are consistently catching fish in the 4 to 6 pound range on every trip. With optimal water conditions we are able to sight fish the big boys!

Float Trips

Fall is a great time to float fish for smallmouth bass or trout. Our trout trips down the Watauga, Catawba, and South Holston Rivers are a great way to take in the scenery of WNC and E. Tennessee. The big fish are on the move and we are having great days fishing double nymph and dry dropper rigs. For those who like to throw streamers, the streamer bite will continue to get better as the weather cools.

The smallmouth bass bite is still going off, we are picking up nice bass on fly and light tackle. Fall is great time to target big bass! We are primarily floating the Nolichucky and French Broad rivers for smallmouth. If you want to experience a trip away from the crowds we strongly recommend a smallmouth trip!

We are offering \$50.00 off on all float trips book between now and Nov. 1st.

Delayed Harvest

Delayed harvest in North Carolina is just about to crank up. Delayed Harvest streams are heavily stocked and managed under catch and release regs from Oct. 1st to the first Sat in June. We offer wade and float trips on Delayed Harvest designated waters. These waters are great for beginners.

Carp on the Fly

Folks if you have ever thought about carp on the fly now is the time to book. Carp season will be winding down over the next couple months. We are seeing good numbers of carp in the shallows of area lakes. A carp trip is also a great practice for those who are planning a saltwater trip. All trips are taken in a 16ft IPB flats boat.

Give us a call at 828-446-5552, or email us at Appflyguides@yahoo.com
